# ACTIVTY: Think in Boxes

Student: Errol Tabangen
School: University of the Northern Philippines
Date: January 30, 2026

MAJOR SECTIONS:
- Header
- Sidebar
- Main Content/Video Grid

SUB-SECTIONS:
Header
- Logo
- Search bar
- Profile icon

Sidebar
- Home link
- Shorts link
- Subscription link
- Library link

Main Content/Video grid
- Featured videos
- Video thumbnails
- Video titles
- Channel names

PROCESS AND REASONING:

When I first opened the YouTube homepage, I approached it by looking at the page as a set of large blocks rather than focusing on every small detail. I identified the header, sidebar and main content area as the major sections. This approach helped me simplify a complex layout and gave me a clear starting point for understanding how the page was structured.

Next, I broke down each major section into smaller elements. In the header, I noted the YouTube logo, search bar, and profile icon. In the sidebar, I observed links like Home, Shorts, Subscriptions, and Library. In the main content area, I identified video thumbnails, titles, and channel names. Analyzing these components helped me understand the page hierarchy and relationships between elements. This process reinforced the importance of planning a webpage layout before coding, making it easier to structure HTML and CSS efficiently while ensuring the design is organized and navigable.
